28 November 2007

**ELS 38 2008**

### **BOTSWANA STOCK EXCHANGE LISTING**

Perth-based integrated energy company Aviva Corporation Limited (ASX:AVA) has expanded its international presence by today successfully listing on the Botswana Stock Exchange (BSE).

Aviva joins a growing list of international resource companies who have obtained a secondary listing on the BSE.

Aviva Chief Executive Officer Lindsay Reed said the BSE listing was further evidence of the company's ongoing commitment and expansion in Botswana, where it is rapidly advancing its 1500MW Mmamantswe integrated energy project.

The BSE is the third largest financial exchange in Africa, with more than \$US5 billion of domestic funds under its management.

"We are pleased to have completed our successful listing on the Botswana Stock Exchange. We are continuing to make rapid progress at Mmamantswe and look forward to developing a significant shareholder base in Botswana which will benefit all Aviva shareholders," Mr Reed said.

During the quarter Aviva completed an orientation drill program at the coal deposit that will fuel the Mmamantswe energy project. In total, 32 holes have been drilled for approximately 3,500 metres. The coal intercepts logged support the initial target of 600 million tonnes. Aviva expects to announce a resource estimate for the deposit by the end of the December quarter.

## **ABOUT AVIVA**

Aviva is an integrated energy company listed on the Australian Stock Exchange with its head office in Perth. The company is growing a portfolio of integrated energy assets. Aviva is progressing the development of a 2x200MV baseload power station in the Mid West region of Western Australia. The Project will be known as the Coolimba Power Project.

Coolimba Power is ideally located in the northern half of the SWIS power grid to take advantage of demand growth both in the SWIS and from new resource projects in the Mid West Region. The location has the advantage of low cost fuel, available water, adjacent infrastructure, existing mining lease and freehold land. Aviva is developing a 2x200MW base load power station in the Mid West, which will include the latest in emissions technology.

Aviva is earning a 90% interest in the Mmamantswe project in Botswana where it is targeting a 600Mt coal deposit. The project is well positioned, being on the South African border and adjacent to key infrastructure including, highway, railway, and high voltage transmission lines.
